>> The 7th Thailand-China joint workshop on ocean science and technology collaboration was held in Phang-nga, Thailand

During July 14-16, 2015, The 7th Thailand-China joint workshop on ocean science and technology collaboration was held in Phang-nga, Thailand.

>> Prof. Somkiat Khokiattiwong was selected as vice-chair of IOC in June, 2015 in Paris

Prof. Somkiat Khokiattiwong, one of the steering committee member of OFS and the chair of SEAGOOS, was elected as vice-chair of IOC during the 28th Session of the Assembly in June 2015.

>> Prof. Fangli Qiao received Wooster Award of PICES on Oct 20, 2014

At the 2014 PICES Annual Meeting in Yeosu, it was announced that Prof. Fangli Qiao (First Institute of Oceanography State Oceanic Administration, Qingdao) was the recipient of the 14th annual Wooster Award.

Assimilation System for Southeast Asian Coastal Waters (JAXA-JAMSTEC-Nagoya Univ.)

Ohishi, Hihara, Miyazawa, Aiki, Ishizaka, Kachi

Model: (Mellor 2004; Jordi and Wang 2012)

sbPOM (the Stony Brook Parallel Ocean Model)

Resolution and Lateral Boundary:

1/36° x 47 layers Daily one-way nest

1/12° x 47 layers

SODA (Simple Ocean Data Assimilation)

monthly climatology (Carton et al. 2000)

Atmospheric forcing:

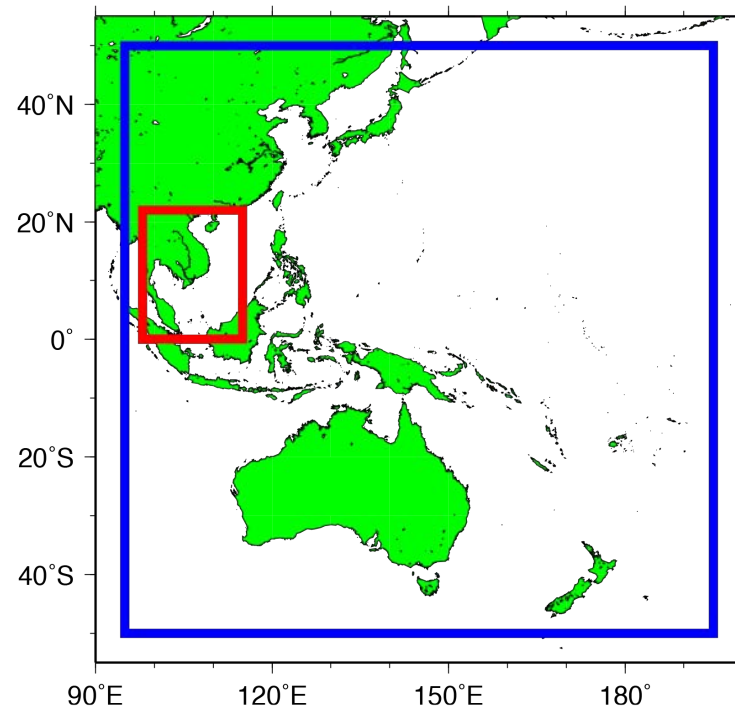

JRA55 (Japanese 55-year reanalysis) (Kobayashi et al. 2015) +

GSMaP (Global Satellite Mapping of Precipitation) (Okamoto et al. 2005)

River discharge:

CaMa-Flood (Catchment-based Macro-scale Floodplain) / GSMaP

Spin-up period: 2011.01.01 – 2015.07.07

Assimilation Scheme:

LETKF (Local Ensemble Transform Kalman Filter) (Hunt et al. 2007; Miyoshi et al. 2010)

Ensemble member: 20, Time interval: 1day

Assimilation Data:

Temperature/Salinity profiles

GTSP (Global Temperature and Salinity Profile Programme, Sun et al. 2010) and

AQC Argo (Advanced automatic QC Argo, JAMSTEC)

formerly the National Oceanographic Data Center (NODC)... [more on NCEI](#)

The Global Temperature and Salinity Profile Programme (GTSP)

NOTE: GTSP's Connection with Global Climate Observing System (GCOS): The Global Climate Observing System (GCOS) recognizes the GTSP as one of the international operational activities that provide essential, sub-surface climate variables of temperature and salinity profile data. GTSP provides timely and complete data with documented quality flags and implements internationally agreed quality control and overall management of ocean data fully in accordance with the GCOS action plan.
