

Panel discussion  
*“Data/information sharing for  
Green Growth”*

# Green Economy and Green Growth

- *“an economic system which promotes sustainable growth while improving human well-being, by pursuing economic growth and the environment in tandem, properly utilizing and conserving natural assets and benefits from ecosystem services”*.  
(UNEP)
- Growth or transition towards Green Economy:  
Green Growth

# Three questions

1. What are possible (longer-term) contributions of your sector to achieve Green Growth?
2. What data/information does your sector need in order to contribute to Green Growth more effectively?
3. With the data/information to share (above mentioned), what kinds of coordinated actions (shorter term) could be made to accelerate Green Growth?
